MaxxNet® can be used to bale the most demanding crops in the harshest climatic conditions.

MaxxNet® allows contractors and farmers to produce the highest density bales, reducing transport and storage costs, increasing profitability.

MaxxNet® provides contractors and farmers with the ability to use the full potential of their machines to make the heaviest and densest bales possible. Ultimate strength comes balanced with improved S2S Side to Side technology.

MaxxNet® will spread across the bale surface giving full bale coverage.

MaxxNet® allows contractors and farmers to "BALE WITH ULTIMATE STRENGTH".
