

# SILACORDMAXX<sup>®</sup>

## Less Plastic Maximum Productivity

# 7+

**LAYERS** COUCHES | CAPAS |  
LAGEN | CAMADAS

**A co-extruded Sustainable Silage Stretch Film  
engineered with high puncture resistance.**

Its superior strength guarantees its suitability for round bale wrapping in the toughest conditions.

Suitable For All  
Balewrappers

High Puncture &  
Tear Resistance

Consistency  
Good Elasticity

Fully  
Recyclable

ECOLOGICAL AND SUSTAINABLE MANUFACTURING

### Efficient & Sustainable Silage making

Silacord has a high anti-UV protection to prevent film degradation and high barrier properties to prevent spoiled fodder.

**Silacord stretch film is produced with the latest generation of blown-film co-extrusion equipments enabling:**

- Strict control over thickness distribution for better overall cling behaviour
- Strict control over winding tension eliminating roll telescoping effect and cling/noncling behaviour along the entire roll
- Strict control over winding length guaranteeing minimum meters per roll as announced

**Silacord stretch film is the result of rigorous and continuous R&D work, produced with unconventional raw materials to maximize the benefits of using this multilayer product:**

- Extreme impact for risk free drop-off
- High puncture resistance for optimum application in square bales
- Well balanced tear resistance for good final cut with less split
- Good elongation to prevent neck-in, ensuring perfect layer overlap while keeping high stretch ratios
- Excellent barrier properties without using EVOH
- Silacord stretch film is 100% LLDPE and fully recyclable

**SILACORD MAXX STRETCH FILM**

750MM x 2000M

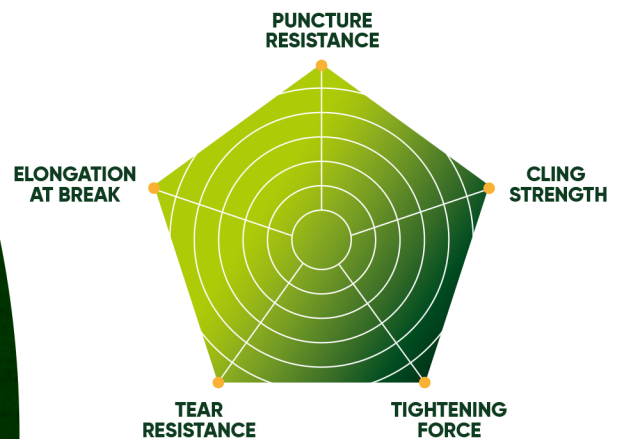

40 Rolls / Pallet

Colours Black, Green, White

Produced using the latest **blown-film co-extrusion technology**, **Silacord multilayer stretch film offers:**

- ▶ **HIGH PUNCTURE AND IMPACT RESISTANCE;**
- ▶ **HIGH UV PROTECTION FOR MINIMUM 1 YEAR EXPOSURE, EVEN IN THE MOST EXTREME WEATHER;**
- ▶ **EXCELLENT BARRIER PROPERTIES TO PREVENT FORAGE DEGRADATION;**
- ▶ **COMPATIBLE WITH ALL WRAPPING MACHINES;**
- ▶ **BEING 100% LLDPE IS FULLY RECYCLABLE;**
- ▶ **COMBI MACHINES BALLERS**
- ▶ **NOT PRE-STRETCHED**

Silacord production technology allows for a better performance with lower thickness, **resulting in less plastic per bale without risking balling process and forage quality.**

**Silacord vs Competitors**
